Project Management

We project our software packages according to the needs of our customers, and position the projects in the most appropriate way for the structure, working style and processes of the company.

We tailor our solutions to your work processes with our tailor-made projects.

Continuous Services for Living Projects

Digital Transformation Consultancy

The success of the project is possible by analyzing the situation well before and creating a road map accordingly. With our consultancy service, we promise to progress together on the digital transformation journey.

Project Management Office

Living projects are our priority. For this reason, we ensure that the project progresses with minimum error. Customers can reach and get information about the projects from project manager.

Customer Experience Center

Business partners and field teams of the main company may need assistance in any moment of the day. We ensure the continuity of the operation with the Customer Experience Center, which provides the expert support.

Training and Operatorship

We support the users with comprehensive face-to-face or digital trainings. With the operator service, we ensure the continuity of the routine operations in the project with the operators assigned to the project.

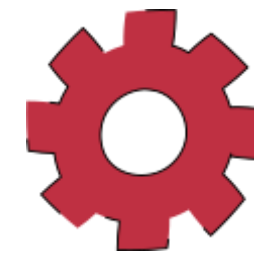

Continuous Services for Living Projects

Hosting Services

We are also able to provide hosting services to our customers with the help of our "High-Capacity Server" investments.

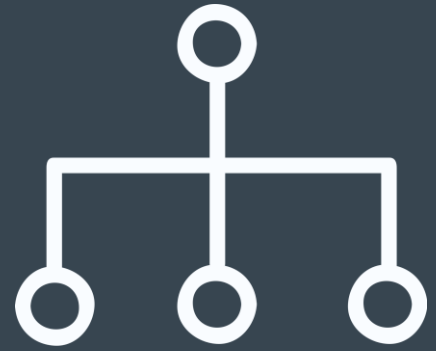

Technical Services

With the support of our sister company Univis, we ensure the complete progress of the project with the hardware and technical service.

The image is a horizontal collage of three distinct scenes. The left scene shows a close-up of two hands shaking in a firm grip, with a white coffee cup on a saucer and some papers visible in the background. The middle scene shows a man in a black cap and work clothes working on the side of a dark-colored car. The right scene shows a blue forklift carrying a large stack of red pallets in a warehouse setting.
